

**List of functions in package ‘rgr’ and other ‘rgr’ or package functions they call:**

**1. Statistical graphics functions and required Library functions:**

shape  
    gx.hist, bxplot, gx.ecdf, cnpplt, remove.na  
    Note – gx.hist, gx.ecdf, cnpplt (and bxplot) may be called independently  
inset  
    gx.hist, gx.stats, cnpplt, remove.na  
inset.exporter  
    inset  
bwplot  
    cat2list  
bwplot.by.var  
    var2fact, bwplot  
tbplot  
    cat2list  
tbplot.by.var  
    var2fact, tbplot

**2. Mapping functions and required Library functions:**

edamap  
    syms, remove.na, eqscplot (Library MASS)  
edamap7  
    cutter, remove.na, eqscplot (Library MASS)  
edamap8  
    cutter, remove.na, eqscplot (Library MASS)  
caplot  
    cnpplt, interp (Library akima)

**3. Summary statistics functions and required Library functions:**

gx.stats  
    remove.na  
fences  
    remove.na  
fences.summary  
    fences  
framework.summary  
    framework.stats

**4. Data conditioning functions:**

ltdl.fix  
ltdl.fix.df  
remove.na  
gx.subset

**5. QA/QC support functions and required Library functions:**

anova1  
    remove.na  
anova2  
    anova1  
thplot1  
    remove.na  
thplot2  
    thplot1

**6. Utility functions:**

dfest  
display.lty  
display.marks  
display.alts  
display.ascii.d  
display.ascii.o  
display.rainbow  
syms.pfunc  
syms
