

# Package ‘genderapi’

July 14, 2025

**Type** Package

**Language** en-US

**Title** Client for 'GenderAPI.io'

**Version** 1.0.3

## Description

Provides an interface to the 'GenderAPI.io' web service (<<https://www.genderapi.io>>) for determining gender from personal names, email addresses, or social media usernames. Functions are available to submit single or batch queries and retrieve additional information such as accuracy scores and country-specific gender predictions. This package simplifies integration of 'GenderAPI.io' into R workflows for data cleaning, user profiling, and analytics tasks.

**License** MIT + file LICENSE

**URL** <https://github.com/GenderAPI/genderapi-R>

**BugReports** <https://github.com/GenderAPI/genderapi-R/issues>

**Imports** httr, jsonlite

**Depends** R (>= 3.5.0)

**Encoding** UTF-8

**Suggests** testthat

**RoxygenNote** 7.3.2

**NeedsCompilation** no

**Author** Onur Ozturk [aut, cre]

**Maintainer** Onur Ozturk <onurozturk1980@gmail.com>

**Repository** CRAN

**Date/Publication** 2025-07-14 17:00:10 UTC

<i>get_gender_by_username</i> . . . . .	4
<i>get_gender_by_username_bulk</i> . . . . .	5

**Index****6****get\_gender\_by\_email     *Get Gender by Email*****Description**

Get Gender by Email

**Usage**`get_gender_by_email(api_key, email, country = NULL, askToAI = FALSE)`**Arguments**

<code>api_key</code>	Your GenderAPI.io API key.
<code>email</code>	Email string to check.
<code>country</code>	Optional two-letter country code (e.g. "US").
<code>askToAI</code>	Logical. TRUE to force AI lookup, FALSE by default.

**Value**

A list with gender prediction result.

**get\_gender\_by\_email\_bulk**  
*Get Gender by Email (Bulk)***Description**

Get Gender by Email (Bulk)

**Usage**`get_gender_by_email_bulk(api_key, data)`**Arguments**

<code>api_key</code>	Your GenderAPI.io API key.
<code>data</code>	A list of named lists. Each list can have: - email (string, required) - country (string, optional) - id (string or integer, optional)

**Value**

A list with bulk gender prediction results.

---

get\_gender\_by\_name      *Get Gender by Name*

---

**Description**

Get Gender by Name

**Usage**

```
get_gender_by_name(  
    api_key,  
    name,  
    country = NULL,  
    askToAI = FALSE,  
    forceToGenderize = FALSE  
)
```

**Arguments**

api_key	Your GenderAPI.io API key.
name	Name string to check.
country	Optional two-letter country code (e.g. "US").
askToAI	Logical. TRUE to force AI lookup, FALSE by default.
forceToGenderize	Logical. TRUE to force analysis of nicknames.

**Value**

A list with gender prediction result.

---

get\_gender\_by\_name\_bulk      *Get Gender by Name (Bulk)*

---

**Description**

Get Gender by Name (Bulk)

**Usage**

```
get_gender_by_name_bulk(api_key, data)
```

**Arguments**

<code>api_key</code>	Your GenderAPI.io API key.
<code>data</code>	A list of named lists. Each list can have: - name (string, required) - country (string, optional) - id (string or integer, optional)

**Value**

A list with bulk gender prediction results.

---

`get_gender_by_username`

*Get Gender by Username*

---

**Description**

Get Gender by Username

**Usage**

```
get_gender_by_username(
    api_key,
    username,
    country = NULL,
    askToAI = FALSE,
    forceToGenderize = FALSE
)
```

**Arguments**

<code>api_key</code>	Your GenderAPI.io API key.
<code>username</code>	Username string to check.
<code>country</code>	Optional two-letter country code (e.g. "US").
<code>askToAI</code>	Logical. TRUE to force AI lookup, FALSE by default.
<code>forceToGenderize</code>	Logical. TRUE to force analysis of nicknames.

**Value**

A list with gender prediction result.

---

`get_gender_by_username_bulk`

*Get Gender by Username (Bulk)*

---

**Description**

Get Gender by Username (Bulk)

**Usage**

```
get_gender_by_username_bulk(api_key, data)
```

**Arguments**

<code>api_key</code>	Your GenderAPI.io API key.
<code>data</code>	A list of named lists. Each list can have: - username (string, required) - country (string, optional) - id (string or integer, optional)

**Value**

A list with bulk gender prediction results.
